

IRCXSERIES

INTERCHANGE > with similar product (Nordic interface)

Stucchi®

TECHNICAL FEATURES AND OPTIONS

	Interchange With similar product (Nordic interface)		Sealing description VITON®		Connection system Single acting sleeve
	Available sizes From 1/4" to 1"		Material Stainless steel (AISI 316L)		Available threads BSP
	Operating pressure Up to 300 bar		Locking mechanism Ball locking + safety sleeve		Flow rate Up to 378 L/Min
	Temperature (°C) -20° / +100°		Valving style Poppet		Connection under pressure Not allowed

BENEFITS

- The poppet valve with elastomer seal provides maximum sealing of the couplings once disconnected.
- O-Ring + BackUp ring for optimum protection sealing.
- Additional O-Ring for extra sealing capacity and to contain spray effect to avoid soil contamination.
- High durability.
- Reference products for tough applications, typically used in Nordic countries.
- Safety sleeve to prevent accidental disconnection.
- Shape of internal parts is optimized to reduce turbulence and pressure drop.
- High resistance to pressure impulses.
- Compact design.
- Simple to use.

HOW TO USE

- Before to connect, clean the mating surface of the couplings to avoid dirt inclusion in the circuit.
- To connect: pull back the sleeve of the female coupling, align the female with the male coupling and push one into the other until both halves are fully connected and release the sleeve.
- To avoid accidental disconnection rotate safety sleeve.
- To disconnect: unlock the safety sleeve and pull back the sleeve of the female coupling, pull out the mating half.

*Spillage is an indicative value of the fluid loss during disconnection (according to ISO 7241-2 test method)

Material:

- Construction: Stainless steel AISI 316L
- Springs: AISI 302
- Locking ball: AISI 316

Temperature range:

Seals in VITON® (for IRC -X) : from -15°C to +180°C (from +5 °F to +356 °F).
Please read carefully "instruction and warning" for proper selection of the products.

Tests performed:

The couplings have been tested at max. operating pressure for 200.000 impulses according to ISO 7241-2 test method.

WARNING

A defect, a wrong choice or an improper use of products, can cause injury to persons, animals and objects.

Never connect or disconnect with dynamic pressure (e.g. pump on).

Do not use the coupling disconnected with high impulse pressure.

Do not couple-uncouple with flow and/or pressure in the circuit.

Do not couple-uncouple when the temperature inside of the circuit is higher than 80 °C (176 °F).

Check the maximum allowable working pressure of the port in use.

Make sure that the medium used is compatible with seal and material as indicated for each series.

In case of doubt please contact Stucchi Technical Support.

The interchangeability is mentioned under the assumption that the manufacturer of the considered products has not changed any dimension.

It is MANDATORY to read and closely follow the instructions. Last updated version always apply at time of installation, see latest written Instructions on Stucchi website (www.stucchi.it) before selecting or using Stucchi products.

BackUp ring in Teflon®

PROTECTIVE CAPS FOR IRC SERIES

Protective caps are always recommended to protect the couplings from damage, dirt inclusion, and will increase the product life. This is particularly important in mobile applications where exposure to weather and aggregate materials are common.

The protective caps for IRC couplings are manufactured in PVC with connection lanyard.

Body Size/Description		Protective Cap		Material/Color
		Plug for Female	Cap for Male	
1/4"	IRC14			PVC
3/8"	IRC38			PVC
1/2"	IRC12			PVC
3/4"	IRC34			PVC
1"	IRC100			PVC
